Councilmen,

Sorry for late comments.

A few points to make after talking with retired DTSC branch chief  
Scott Simpson.

-It appears that when testing found continual results exceeding  
the clean up goal of .22, DTSC changed the goal to 1.0 this past  
January and then didn't make public notice until several months  
later. Also didn't hold public hearing on the change.

-Tonight's report states DTSC finished soil clean up. This is  
misleading in that they kept finding contamination down to  
bedrock and to ground water. They didn't test groundwater because  
if they had and it tested positive, they would have had to  
continue with a groundwater clean up. We believe there is PCBs  
and Dioxins in the groundwater, in violation of the Federal Clean  
Water Act.

-It would be reasonable to require test wells on the north side  
of the property, between the property and river, to test and  
assure contaminants are not migrating into the Santa Ana River.

Scott Simpson could more expertly advise.

Respectfully,

Kevin Dawson
